

# Use renewables

... would also partly insulate thermal generators from taking the hits stemming from ongoing transition in the country's energy mix. The Central Electricity Regulatory Commission would make necessary regulatory changes to complement the scheme. The Central Electricity Authority will monitor the scheme, and suggest changes and road maps for its success. According to IDFC Securi-

ties, the scheme will allow power generating companies such as NTPC to set up wind/solar power stations and avail of the benefits of this policy, given that some of the power stations located far from pithead have an energy charge higher than ₹3/unit. In a push to increase the share of green energy in its installed capacity, NTPC has recently come up with tenders for 4,750 MW of wind and solar power projects.

# Power min unveils scheme to help 2,500 MW stranded thermal plants

**FE BUREAU**  
New Delhi, April 9

In an attempt to bring some relief to the stressed thermal power sector, the government has introduced a pilot scheme to procure electricity from power plants without PPAs. A combined capacity of 2,500 megawatt (MW) will be procured through this scheme.

Though no time line for inviting tenders has been announced, the power ministry

said PTC India would sign three-year (mid-term) power purchase agreements (PPAs) with successful bidders and contract with power distribution companies (discoms) to sell electricity.

The pilot plan proposes that a single entity, which quotes or matches the lowest bid in the auction, would be allocated a maximum capacity of 600 MW. A company cannot quote part capacity from different power stations in the same bid.
